Innovations

The Future of Horticulture is Here!

DLI CRI Series UV 150W DE

One of a kind DLI exclusive

This fixture is one of a kind. Dutch Lighting Innovations is the only grow light manufacturer that develops and builds UV-light fixtures able to recreate all the UV-A and UV-B advantages inside. All advantages of sunlight, in a controlled environment.

More terpenes and cannabinoids

Healthier plants

There are specific photoreceptors for UV-B and UV-A that plants use to sense and learn about the environment around them and to regulate internal processes based on this information. UV exposure at the right dose manifests in healthier, more resilient plants. Stimulation with UV light increases leaf and cell wall thickness and makes plants less susceptible to bugs and mould. This characteristic of UV light lowers the need for insecticides and fungicides and can also assist in the breakdown of residues that remain on surfaces.

More vigorous plant grow

Supplement to HPS and/or LED

The fixture can be used in combination with both HPS and/or LED and serves as a supplement to the standard grow light. The wide, UV resistance reflector makes the fixture suitable for multiple lay-outs. UV lights work best, when they are on for at least 2 to 4 hours a day during the lighting cycle. The fixture can be used with our DLI controllers and therefore can be integrated with all existing DLI installations..

The Grow Light

Designed and made in The Netherlands

WARNING:
High-Intensity Ultraviolet Radiation Light

Turn Off UV Light Before Entering
UV Radiation Is Harmful To Skin And Eyes

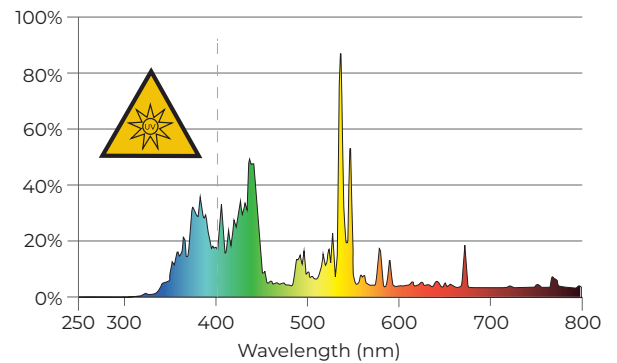

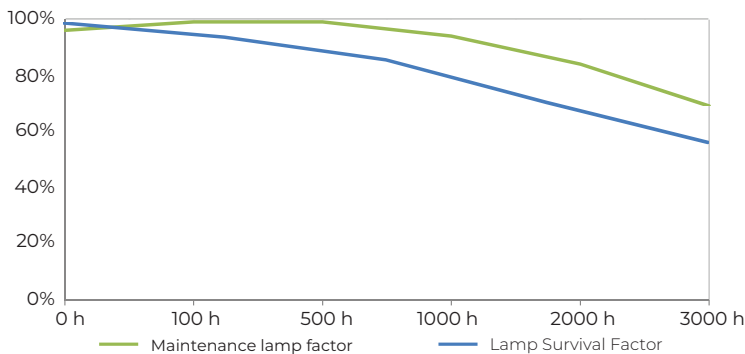

μMol/J Output	160	IP Rating	IP20
Beam Angle	140°C	Product Dimensions	16.9 x 11.4 x 7.1 inch 43 x 29 x 18 cm
Power	150W	Product Weight	10.6 lb / 4.8 kg
Voltage Range	208-347V	Certifications	CE, CSA, UL 1598, FCC part 18
Efficiency	1.1	Country of origin	The Netherlands
Dimming	N/A	Warranty	3 Years (lamp and reflector not included)

Note: Specifications are subject to change without prior notice or obligation on the part of the manufacturer.

UV-C Risk group 3
WARNING UV-C emitted from this product.
 Avoid eye and skin exposure to unshielded product.
 Follow installation instructions and user manual.

Warranty fixture: **3 years (lamp and reflector not included)**
 Advice: **Replace lamp Each 2000 hrs**
